

Students are expected to follow all school rules at all times in the classroom and online. We are a PBIS (Positive Behavior Intervention and Support) school. Check out our school planner to see the matrix of our school wide behavior expectations. Here is our general framework:

- Make responsible choices.**
- Use time wisely.**
- Improve yourself.**
- Respect others.**

Think of everything you do for online learning as the same as being at school and in class. When you are online with class or posting for a class, you are interacting and behaving like you are in the physical classroom.

DOs

- Follow all school rules.
- Be respectful of all students.
- Use respectful and school-appropriate language/images at all times, in all platforms.
- Stay actively engaged in the virtual classroom. Stay on-task and complete the activities assigned for that time.
- Complete and edit your own material. Other students' work is off limits, unless it is a collaboration agreed upon by the teacher.

DON'Ts

- Students may not take pictures or make any recordings of the teacher and/or other students in class. Images and recordings may not be distributed (via text, app, social media, or internet).
- Plagiarizing (copying work from another source and passing it off as your own) is never allowed. This includes using work another student has done.

### Helpful hints for students:

- Sign in via your school email
- Use your full names during class time or any other platforms used for school.
- Mute your microphone when you login
- Login from a quiet, well-lit location
- No use of other electronics (phones, video games) during virtual class time
- Using headphones will help to reduce echos and background noise
- If chat box is enabled by your teacher, only ask appropriate questions and stay on topic
- Have all your supplies ready so you can be present for the entire class
