

Disney Two Story Modular Project
Update 11/19/21

Dear Disney Parents and the Community,

This week the building stucco scope of work was completed with the color coat application wrapping up. Gutter and downspout installations are nearly complete. The building exterior lighting is now under way and the elevator systems scope has resumed.

Upcoming project activity will include metal roofing of the machine room and elevator as well as the projects site utilities resuming.

We look forward to energizing the new building as well as the completion of the building exterior.

Thank you for your support!

Larry Cross
Director of Facilities
