

Disney Two Story Modular Project
Update 9/3/21

Dear Disney Parents and the Community,

This past week work on the building sewer tie ins, machine room pad, building vents and interior finishes continued to progress. Also, additional mechanical, electrical, and plumbing work continued throughout the building and site.

Next week we are scheduled to receive the remaining railing materials to allow for the completion of welding operations.

We are looking forward to the completion of site back fill and compaction around the building perimeter in preparation of upcoming flatwork.

Larry Cross
Director of Facilities
