Cameras shall not be placed in areas where students, staff, or community members have a reasonable expectation of privacy. Any audio capability on the district's surveillance equipment shall be disabled so that sounds are not recorded.

These signs shall inform students, staff, and visitors that surveillance may occur and shall state whether the district's system is actively monitored by school personnel. The Superintendent or designee shall also provide prior written notice to students and parent/guardians about the district's surveillance system, including the locations where surveillance may occur, explaining that the recordings may be used in disciplinary proceedings, and that matters captured by the camera may be referred to local law enforcement, as appropriate.
